LIZENUS-ATMOSPHERIC ELECTRICITY.

Additional Remarks on Atmospheric Electricit

v A. WISLIZENUS, M.D

The delay in the publication of this volume enables me add to my observations of atmospheric electricity in 186 the result of my observations in 1862. The latter observations have been made in the same manner and by means the same fine glass thread, which, after many thousand to sions, proves as good as ever. I present herewith in tabul form the general result of my observations in 1861 and 186

I. Monthly mean of Positive Atmospheric Electricity in 1861 of 1862, at St. Louis, Mo., based upon daily observations at 6, 9, 3, 6 and 9 o'clock, from morning till night.
